Dallas, TX 75270

Dear Mr. Cochran:

This letter is to confirm Koppers agreement on the technical scope of work required by the Administrative Order on Consent for the Texarkana and South Cavalcade CERCLA sites. It is our understanding that handwritten changes, worked out by telephone March 21 and 22, 1985, in the RI/FS work plans for these sites will be incorporated into the final documents. It is also our understanding that Koppers will have the opportunity to review the final RI/FS work plan and associated documents before these reports are released to the public. Per Koppers letter from Mr. Mark Urbassik to Mr. James L. Turner of EPA (March 21, 1985), this letter satisfies the "technical scope of work" contingency for Koppers signing of the Administrative Orders on Consent for the Texarkana and South Cavalcade Sites.

Additionally, Koppers would like to suggest that, after the formal signature of the Administrative Order, EPA will arrange for a public meeting at which EPA and Koppers will present the scope of work for the Texarkana site to the residents of the Carver-Terrace Subdivision to seek their comment.

If you have any questions or comments, please do not hesitate to call,

Sincerely yours,

S. Michael Tymiak
